

Hands-on Lab 4: Getting Started with Cognos Analytics

Estimated time needed: 40 minutes

Cognos Analytics is an AI-fueled business intelligence platform that supports the entire data analytics cycle, from discovery to operationalization. It provides users with data discovery capabilities to visually explore and interact with their data to identify the key insights for improving data driven decisions. Users can perform data discovery and then quickly assemble that information into interactive, visually appealing dashboards; all without the need of formal programming.

In this lab, first you will learn how to sign up for IBM Cognos Analytics trial plan, and learn general navigation around the Cognos Analytics user interface. Next, you will learn how to upload external data files to Cognos Analytics, and then learn how to start a new dashboard with templates. Lastly, you will learn how to create a simple dashboard.

Software Used in this Lab

In the videos in the course, for the hands-on labs we will be using IBM Cognos Analytics trial version (currently limited to 90 days) as this is available at no charge.

Dataset Used in this Lab

The dataset used in this lab comes from the VM designed to showcase IBM Cognos Analytics. This dataset is published by IBM. You can download the dataset file directly from here: [CustomerLoyaltyProgram.csv](#)
